Re:Typographic Anatomy Gs

arm · eye · leg · apex · bowl · ear · hook · link · loop · stem · tittle · aperture

stroke · joint · crossbar · counter · terminal · shoulder · crotch · tail · spur · beak · spine

NOTES

The eye of the e, the ear, link and loop of the g (marked in red) are unique terms to those specific characters and not used elsewhere

The following terms are sometimes used to describe the same element: Bowl/Lobe · Finial/Terminal · Apex/Vertex · Stroke/Diagonal Stem

Aperture vs. Counter an aperture denotes the opening to a mostly enclosed space in a character, a counter is a fully enclosed space in a character

Shoulder vs. Hook a shoulder leads into a stem, a hook leads into a terminal or beak
